GEBORGENHEIT UND SICHERHEIT VON ANFANG AN

Kollektion 2008

Dear parents,

All products you find in this brochure are basics of Christiane Wegner range.

Products are manufactured in Germany. Excellent workmanship and lovely details give our products a unique character.

Details for bassinet

We guarantee a high quality level by using only fabrics according to Ökotex Standard 100.

The padding is breathable, allows moisture to pass through and is anti allergic.

All basis are made of solid beech wood according DIN EN 1130. The lacquering is harmless to health and complies with toy standard EN 71-3.

Wellness for your baby

To make your baby feel comfortable and secure, all borders of the bassinet do have a soft upholstery and are stuffed with anti allergic paddings.

Long term use

The big size of the bassinet (83 x 43 cm) allows you a longer use during the growth of your baby. Also bassinet allows you a high mobility inside your house. Your baby is always nearest to you.

Details for prams

Our range offers you a high quality level with a lot of innovations.

All fabrics and fillings do comply Ökotex Standard 100.

Chassis parts are produced according to the instructions of DIN EN 66353.

A growing belt system fixes your baby inside the stroller. It belongs to each seat unit. Also a raincover.

The soft carry cot do have the size of 79 x 34 cm and is changeable into foot-muff.

If you have any questions, please do not hesitate asking us.

Yours
Christiane Wegner Team

New form

Teleclip

Teleclip is a pram with a swing handle. It can be folded together from both sides (front or behind). When folded it fits into the smallest boot.

Big advantage of Teleclip is high itself. Mostly phantastic for tall parents. Children, when sitting in push chair, has better look into environment, because of high seat unit.

It has a unique set up mechanism, which can even be done single handed. If you remove the carry nest you have a compact push chair.

The convertible carry nest has a lying measurement of 79 x 34 cm. An aluminium frame guarantees you a high stability. Also you can choose a hard carry cot, including mattress and foot muff. Lying measurement: 89 x 35 cm.

The weight including wheels and hood is 13,6 kg.

Tandem

Tandem-Lift is a versatile and sturdy pram for two babies. When using the lift-traverse both seats can be adjusted to the desired position. For the push chair that means that baby sitting at the back looks over the baby sitting in the front.

The seats can be adjusted to either position (front or back) and so allowing for a face to face positioning. (Width 62 cm).

It offers you the possibility, by means of a diagonal traverse, so that both children can sit beside each other. (Width 82 cm).

Of course the Tandem can easily be converted to a single pram.

The frame can easily be folded with it's attachments and thus easily be set up again. Took apart it fits also to smaller boots.

It can be used from 0 to 36 month approximately and is available in different designs.

Folded measurements incl. attachments and wheels:
length 120 cm, width 61 cm, height 47 cm.

Folded measurements without attachments:
length 108 cm, width 61 cm, height 38 cm.

Trio-Lift

Trio-Lift is a triplet pram with many functions. The triplets can look forward to lying in very soft and big carry nests.

The length of the pram can be shortened with the lift-traverse function.

When the carry nests have been removed your children can also be converted to a twins pram or a single pram.

Each unit is equipped with a belt system, good upholstery and a rain cover.

The Trio-Lift has a soft suspension and for your childrens safety it is also fitted with two brakes. It is available in different designs.

Measurements keep out from our homepage.

Accessories for all prams can be done very easily. It is up to your desire.
